Appendix -A

Index No:

Data collection sheet to measure the management of construction waste generation

Client / applicant -

Contractor -

Name of the project -

Area of the Building - sqft/m²

Actual Project Duration in no. of months -

What is the quantity of construction waste generated in your project during the project duration?

If you used trucks for disposal

- a. Volume of the wastage delivered trucks (in Cubes)
- b. No. of truck loads of wastage per month (on average)
- c. Total waste generation from the project (in Cubes)

If you did not use trucks for disposal

(or information not available for the above)

Indicate the quantity of total amount of waste generation
