

1999/2000

**THERMAL PERFORMANCE OF  
DIFFERENT ROOF AND INSULATION  
SYSTEMS  
IN TROPICAL THERMAL ENVIRONMENTS.**

The Dissertation Presented to the  
Faculty Of Architecture of the  
University Of Moratuwa, Sri Lanka  
for the  
Final Year Examination In M. Sc. ( Architecture), and  
to the Royal Institute of British Architects, for  
(R.I.B.A.)  
Part II Examination

## A c k n o w l e d g e m e n t s

I am deeply indebted to Professor Nimal de Silva, Head Dept. of Architecture, in the University of Moratuwa, for his inspiring guidance and encouragement, to complete this task successfully.

Dr. Rohinton Emmanuel lecturer, for his constructive criticism, encouragement and help in the development of this study and for guiding me to make this dissertation a success.

Dr. Ranjith Dayarathna, and Dr. L.S.R. Perera, dissertation coordinators and year masters, for giving their thoughts and comments to enrich this study.

Funding for this project was provided by the University of Moratuwa, under Senate Research Committee (SRC) grant (No. 00/01//01). The author wishes to acknowledge the support received from the SRC and in particular its chairman professor B.L. Tennekoon.

My grateful thanks to my beloved Mother and Father for giving me, all the courage, guidance and support to complete this project.

Also to my dearest Madhuwanthi ,for sharing all the hardships and difficulties and encouraging me to make this a success.

Finally, I thank all those who helped me in numerous ways to see to its successful completion.

## **CONTENTS**

### **ACKNOWLEDGEMENTS**

### **LIST OF ILLUSTRATIONS**

- LIST OF PLATES
- LIST OF FIGURES
- LIST OF TABLES

## **CHAPTER ONE**

### **1.0 INTRODUCTION**

- 1.1 The roof as the main heat gaining element of a building
- 1.2 Problems
- 1.3 Objectives
- 1.4 Limitation
- 1.5 Theory
- 1.6 Method of study.
- 1.7 Analysis method

University of Moratuwa, Sri Lanka.  
Electronic Theses & Dissertations  
[www.lib.mrt.ac.lk](http://www.lib.mrt.ac.lk)

## **CHAPTER TWO**

### **2.0 BACKGROUND STUDY**

- 2.1 Heat and human comfort
- 2.2 Requirement for occupancy comfort
- 2.3 Indoor Climate
- 2.4 Comfort standards
- 2.5 Designing for comforts
- 2.6 Quality of comfort

### **3.0 THE NATURE OF HEAT**

### **4.0 INSULATION**

### **5.0 CONDENSATION**

### **6.0 ENVIRONMENTAL CONDITIONS AND THEIR MEASUREMENT.**

- 7.0 INSULATION OF COLD STORES USING REFLECTIVE INSULATION
- 8.0 CLIMATIC CONDITIONS IN COLOMBO.
- 9.0 SRI LANKAN TRADITIONAL ROOFING SYSTEMS AND THEIR IMPACTS ON INDOOR THERMAL COMFORT.
- 10.0 PROBLEMS IN ROOFS REGARDING THERMAL PERFORMANCE.

### **CHAPTER THREE**

#### **3.0 METHODOLOGY**

- 3.1 Instruments And Equipment's
- 3.2. Process Of Research

### **CHAPTER FOUR**

#### **4.0 RESULTS**

- 4.1 **Data Tables – with / without Insulations**
- 4.2 **Data Table – Percentage Of Heat Changing Ratio**

### **CHAPTER FIVE**

#### **5.0 ANALYSIS**

- 5.1 Thermal performance of Calicut Tile with Insulation
- 5.2 Thermal performance of Asbestos with Insulation
- 5.3 Thermal performance of Zinc Alum cladding with Insulation
- 5.4 Thermal performance of Whitewashed Asbestos with Insulation.
- 5.5 Thermal performance of Half Round Tiles on Asbestos with Insulation.
- 5.6 Relative performance of all Roof Claddings with Insulation.
- 5.7 Recommendations
- 5.8 **Heat changing ratio.**
  - 5.8.1 Thermal performance of Calicut Tile with Insulation.
  - 5.8.2 Thermal performance of Asbestos with Insulation.
  - 5.8.3 Thermal performance of Zinc Alum with insulation.
  - 5.8.4 Thermal performance of Whitewashed Asbestos with Insulation.

5.8.5 Thermal performance of H.R. Tiles on Asbestos with Insulation

5.8.6 Recommendations.

## **CHAPTER SIX**

### **6.0 CONCLUSION**

6.1 Summary Of Findings

6.2 Limitations

6.3 Direction for further study.

## LIST OF PLATES

---

Plate 1.	3D View of the experimental model	73
Plate 2.	Data logger – (HOBO)	74
Plate 3.	An Isometric view of of the heat sink assembly.	74
Plate 4.	500 w heat source	75
Plate 5.	Voltage stabilizer	75
Plate 6.	Positioning of roof cladding and the thermometer	78
Plate 7.	Experiment with Calicut Tile with Insulation	95
Plate 8.	Experiment with Asbestos Cladding with Insulation	96
Plate 9.	Experiment with Zinc Allum sheets with Insulation	97
Plate 10.	Experiment with White washed Asbestos with Insulation	98
Plate 11.	Experiment with Half Round Tiles on Asbestos with Insulation	99

## LIST OF FIGURES

---

Fig.1. The Earth Sun Relationship.	3
Fig.2. The Angle Of Incidence.	4
Fig.3. Length Of Path Through The Atmosphere.	4
Fig.4. Variation Of Direct Solar Intensity With Height.	5
Fig.5. Passage Of Radiation Through The Atmosphere.	5
Fig.6. Heat Release From The Ground And The Atmosphere.	5
Fig.7. Proportions Of Heat Flowing Downwards From Ceiling.	13
Fig.8. Comparison Of Celsius And Kelvin Temperature Scales.	17
Fig.9. Demonstrate Quantity Of Of Heat	18
Fig.10. Conduction	20
Fig.11. Convection.	20
Fig.12. Radiation	21
Fig.13. Illustrating Unit Conductivity.	22
Fig.14. Typical Conductivity ("K" Values)	23
Fig.15. An Uninsulated Stud – Frame Weatherboard Wall.	25
