

# PERFORMANCE OF ROOF AND CEILING SYSTEMS IN TROPICAL THERMAL ENVIRONMENT

A Dissertation submitted to the  
University of Moratuwa  
As a partial fulfillment of the requirements  
For the Degree of  
Master of science in Architecture.

University of Moratuwa, Sri Lanka.

## ACKNOWLEDGEMENTS

I would like to place on record my deepest gratitude to the following , whose generous contributions in numerous way enabled me to make this essay a reality.

Prof. Nimal de Silva, Head of the Department, faculty of Architecture, University of Moratuwa, for the guidance and encouragement and his valuable time rendered for me throughout the research and study.

I am extremely grateful to Dr Emmanuel, Lecture, Department of Architecture Faculty of Architecture, University of Moratuwa, who has been a constant source of inspiration to me in the task of working this dissertation. Had it not been for his services in way of providing me with valuable criticism, giving me patient guidance and assisting me in numerous other ways. I would not have been able to bring out this dissertation in this form. I so meet express my heart-felt gratitude to him.

Next I must thank sincerely Dr. L.S.R.Perera, Lecture, Department of Architecture Faculty of Architecture, University of Moratuwa, for giving the inspiring initiative pulses for this assignment. I deeply appreciate the patient guidance and constant offered by Mr Nandana, & Chathura , Technical Assistance , Department of Architecture Faculty of Architecture, University of Moratuwa, right through the dissertation. Had it not been for his kind assistance this could not been materialized.

The project was funded by Senate Research Committee Via Grant No: SRC - 00 / 01 01  
A special thank for the chairman, Senate research committee  
Prof. B.L. Tennakoon, for helping to obtaining.....(the grant) \*\*\*\*

My sincere thanks also due to the Maintains Engineer & Workshop Engineer, University of Moratuwa, for giving me valuable guidance to constructed model houses.

I gratefully acknowledge the assistance rendered by my friend Thamara Jayasekara, Chinthaka Nikapiteya,

Finally I am ever grateful to my dear parents for their persistent encouragement and constant guidance.

ACKNOWLEDGEMENT	I
CONTENT	II
LIST OF PLATE	IV
LIST OF FIGURES	VI
LIST OF TABLE	VIII
CHAPTER ONE INTRODUCTION	01
1.1    Why roof is important	01
1.2    Problems	02
1.3    Objectives	03
1.4    Limitation	04
1.5    Theory	04
1.6    Method of study.	06
1.7    Analysis method	07
CHAPTER TWO BACKGROUND STUDY	08
2.1    Theoretical background	09
2.2    Requirements for occupancy and comfort.	12
2.3    Quality of comfort	12
2.4    Designing for comfort	13
2.5    Indoor climate	14
2.6    Contribution of climate and site for performance roof system	14
2.7    How unvented / vented suspended ceilings affect roofs	16
2.7.1    How unventilated suspended ceiling affect roofs.	16
2.7.2    How vented suspended ceilings affect roofs.	16
2.8    Thermal properties of roofs and ceiling materials with related to thermal comfort.	17
2.8.1.    Thermal properties of roof elements.	17

2.8.2.	Required thermal performance for roofs.	18
2.8.3.	Climatic condition in Colombo	21
2.9	Relation ship between traditional roofing materials in Sri Lanka and thermal comfort.	26
2.9.1	Problem of roof with related to thermal performance.	26
CHAPTER THREE METHODOLOGY		29
3.1	Instruments and equipment's	30
3.2.	Process of research	33
CHAPTER FOUR RESULTS		37
CHAPTER FIVE ANALYSIS		38
5.1	Thermal performance of ceiling materials on tile roof	50
5.2	Thermal performance of ceiling materials on asbestos roof cladding	51
5.3	Thermal performance of ceiling materials on zinc alum roof cladding	52
5.4	Thermal performance of ceiling materials on asbestos whitewash roof cladding	52
5.5	Thermal performance of ceiling materials on asbestos +half round tiles roof cladding	53
5.6	Relative performance of ceiling materials on all roof cladding system.	54
5.7	Recommendations	55
5.8	Heat change ratio.	55
5.8.1	Thermal performance of ceiling materials on tile roof	56
5.8.2	Thermal performance of ceiling materials on asbestos roof	56
5.8.3	Thermal performance of ceiling materials on zinc alum roof	56
5.8.4	Thermal performance of ceiling materials on asbestos whitewash roof	56

5.8.5	Thermal performance of ceiling materials on asbestos + half round tile roof	57
5.8.6	Recommendations	57
CHAPTER SIX CONCLUSION		68
6.2	Limitations	70
6.3	Direction for further study	71
BIBLIOGRAPHY		75

## LIST OF PLATES

01	.Constructed model structure	04
02	Design for climatic condition	13
03	Design for climatic condition	13
04	Climate and site affect design and performance.	15
05	View of constructed model houses	30
06	Heat sink	32
07	Data logger	32
08,	Thermal performance of ceiling materials on tile roof	50
09 ,	Thermal performance of ceiling materials on Asbestos roof cladding	51
10	Thermal performance of ceiling materials on Zinc alum roof cladding	52
11	Thermal performance of ceiling materials on asbestos whitewash roof cladding	52
12	Thermal performance of ceiling materials on Asbestos +half round Tiles roof cladding	53
13	Experiment under natural daylight.	71
14	Experimental did on roof top (Sumanadase Building)	72

University of Moratuwa, Sri Lanka.  
Electronic Theses & Dissertations

## LIST OF FIGERS

01	Model house used for experiment (Plan & section)	04
02	Section of typical roof & Detail of section (Section Detail A)	10
03	Temperature variation	14
04	Thirty year trends in diurnal temperature variation during the hottest month (April)	22
05	Thirty – year average daytime thermal comfort in the CMR	23
06	Thirty-year average daytime thermal comfort in the CMR & Thirty-year average thermal comfort trends during the hottest month	24 25
07	Thermal comfort change in the CMR daytime & nighttime	25
08	Model houses Plan & Section	30
09	position of roof materials and thermometer is important.	35
10	Performance roof system –Calicut Tile with Plywood ceiling	39
11	Performance roof system –Calicut Tile with Asbestos ceiling	39
12	Performance roof system –Asbestos roof with Plywood ceiling	41
13	Performance roof system –Asbestos roof with Asbestos ceiling	41
14	Performance roof system –Zinc Alum roof with Plywood ceiling	43
15	Performance roof system –Zinc Alum roof with Asbestos ceiling	43
16	Performance roof system –Asbestos whitewash roof with Plywood ceiling	45
17	Performance roof system –Asbestos whitewash roof with Asbestos ceiling	45
18	Performance roof system –Asbestos + Half round tile roof with Plywood ceiling	47
19	Performance roof system –Asbestos + Half round tile roof with Asbestos ceiling	47
20	Performance roof system –Tile roofs with ceiling (heat change ratio )	59
21	Performance roof system –Asbestos roofs with ceiling (heat change ratio )	61
22	Performance roof system –Zinc Alum roofs with ceiling (heat change ratio )	63

23	Performance roof system –Asbestos White wash roofs with ceiling (heat change ratio )	65
24	Performance roof system –Asbestos + Half round Tile roofs with ceiling (heat change ratio )	67

## LIST OF TABLES

1	Roofing materials - Table – 01	31
2	Ceiling material - Table -02	31
3	Calicut Tile with Plywood ceiling	38
4	Performance roof system –Calicut Tile with Asbestos ceiling	38
5	Performance roof system –Asbestos roof with Plywood ceiling	40
6	Performance roof system –Asbestos roof with Asbestos ceiling	40
7	Performance roof system –Zinc Alum roof with Plywood ceiling	42
8	Performance roof system –Zinc Alum roof with Asbestos ceiling	42
9	Performance roof system –Asbestos whitewash roof with Plywood ceiling	44
10	Performance roof system –Asbestos whitewash roof with Asbestos ceiling	44
11	Performance roof system –Asbestos + Half round tile roof with Plywood ceiling	46
12	Performance roof system –Asbestos + Half round tile roof with Asbestos ceiling	46
13-	m " value of roofs and ceilings, of Moratuwa, Sri Lanka. Electronic Theses & Dissertations www.lib.mrt.ac.lk	49
14	metric for five roof cladding	50
15	metric for ceiling materials on Tile roof	51
16	matrix of pair wise difference with asbestos roof.	51
17	matrix of pair wise difference with Zinc Alum roof	52
18	matrix of pair wise difference with Asbestos white wash roof claddings	53
19	matrix of pair wise difference with Asbestos + Half round Tile roof claddings	54
20	relative performance of ceiling materials on all roof cladding system.	54
21	Heat change in ratio for all combination	55
22	Performance roof system - Tile roof with plywood ceiling	58
23	Performance roof system –Tile roofs with Asbestos ceiling (heat change ratio )	58
24	Performance roof system –Tile roof with ceiling ( heat change ratio )	59
25	Performance roof system –Asbestos roofs with Plywood ceiling (heat change ratio )	60

26	Performance roof system –Asbestos roofs with Asbestos ceiling (heat change ratio	60
27	Performance roof system –Asbestos roof with ceiling ( heat change ratio )	61
28	Performance roof system –Zinc Alum roofs with Plywood ceiling (heat change ratio )	62
29	Performance roof system –Zinc Alum roofs with Asbestos ceiling (heat change ratio )	62
30	Performance roof system –Zinc Alum roofs with ceilings (heat change ratio )	63
31	Performance roof system –Asbestos White wash roofs with Plywood ceiling (heat change ratio )	64
32	Performance roof system –Asbestos White wash roofs with Asbestos ceiling (heat change ratio )	64
33	Performance roof system –Asbestos White wash roofs with ceiling (heat change ratio )	65
34	Performance roof system –Asbestos + Half round Tile roofs with Plywood ceiling (heat change ratio )	66
35	Performance roof system –Asbestos + Half round Tile roofs with Asbestos ceiling (heat change ratio )	66
36	Performance roof system –Asbestos + Half round Tile roofs with ceiling (heat change ratio )	67
