RATIONAL USE OF PLANTS IN BUILDING INTERIORS
FOR THERMAL COMFORT: QUALITATIVE AND QUANTITATIVE ANALYSIS

A DISSERTATION SUBMITTED TO THE UNIVERSITY OF MORATUWA
AS A PARTIAL FULFILMENT OF THE REQUIREMENTS FOR THE DEGREE OF
MASTER OF SCIENCE IN ARCHITECTURE

J H DALUWATTA
DEPARTMENT OF ARCHITECTURE
UNIVERSITY OF MORATUWA
2000
ABSTRACT

Plants have increasingly become an integral part of the interior design of building in recent times. This is due to prevailing fashion and also in an attempt to produce an environment in which people feel psychologically comfortable. And it is also an attempt to be in touch with the nature. This research study aims to find how thermally comfortable environments could be achieved by using indoor plants and find how the different characteristics of plants, such as the color, leaf size, height and even the number of plants affect the internal thermal environment. The research was done in a model situation where all the factors were constant and only the types of plants were changed. Readings related to the indoor air temperature and the indoor relative humidity at different positions inside the house were taken at every one-hour through a full day.

The readings obtained with the plants were compared with readings obtained without plants involving the same indoor environment. The different readings found with different plants reveal that indoor plants directly contribute to its surrounding environment. The experiment further revealed that the indoor air temperature and indoor relative humidity the main variables related to human thermal comfort in building interiors vary with the use of plants. The observation shows green color plants, tall plant and more number of plants as variables, which affect the indoor air temperature. The colored plants effectively reduce air temperature only during the nighttime. The large leaf plants do not reduce the air temperature much effectively and they have a potential to increase the indoor air temperature. The research observations show that the plants do increase the relative humidity but it does not vary with the color of the plant, plant height and number of plants as in the case of air temperature. So the use of indoor plants reduces the indoor air temperature but they are increase relative humidity. Thus plants do not change the indoor environment at condition to a significant comfortable level, but when coupled with psychological comfort the plants offer their effect on the indoor environment, which is quite considerable.
ACKNOWLEDGEMENT

My sincere gratitude to the all the senior lectures of Department of Architecture for their assistance and helps in various ways from the beginning to the conclusion of the study.

My special thanks to Dr L S R Perera who has been very influential in development of text and been very kind enough to give helpful assistance, comments and guidance from the commencement to completion.

Without their generous help, encouragement and directions, this achievement would never have accomplished.

I wish particularly to thank the Senate Research Committee of University of Moratuwa for the grant given for me to carry out the experimental part of the dissertation.

I am also grateful to my Batchmates and Friends for their helping hands.

My sincere thanks to thatthi, ammi and hangi for their help to make this dissertation success.
# CONTENTS

## ABSTRACT

## ACKNOWLEDGEMENT

### CHAPTER ONE

1.1. INTRODUCTION

1.2. THE PROBLEM AND ITS SETTING

1.3. THE RESEARCH RATIONALE

1.4. THE RESEARCH OBJECTIVES

1.5. THE HYPOTHESES

1.6. THE ASSUMPTIONS

1.7. THE METHOD OF STUDY

1.7.1. THE POPULAR PLANTS

1.7.1.1. SCHEFFLERA ARORICOLA

1.7.1.2. THE DIFFERENT TYPES OF PALMS

1.7.1.3. PLEOMELE REFEXA

1.7.2. METHOD OF COLLECTION OF DATA

1.7.3. THE REQUIRED DATA

### CHAPTER TWO

2.1. THERMAL COMFORT

2.2. THERMAL COMFORT DEFINITIONS

2.3. COMFORT SCALES AND INDICES

2.4. APPLICATION OF COMFORT INDICES AND SCALES

2.5. FACTORS AFFECTING THE THERMAL COMFORT

2.6. USE OF PLANTS IN BUILDING DESIGNS

2.7. PLANTS BEHAVIOR AND EXPERIMENTAL STUDIES RELATED TO PLANTS
CHAPTER 03

3.1 RESPONSE DATA 34
3.2 THERMAL COMFORT STANDARD FOR SRI LANKA 35
3.3 COLLECTION PROCEDURES 37
3.4 THE TYPES OF INDOOR PLANTS 39
   3.4.1 TYPE 1 SCHEFFLERA ABORICOLA 39
   3.4.2 TYPE 2 PALM TREES 40
   3.4.3 TYPE 3 PELOMELE REFLEXA 41

CHAPTER FOUR

4.1. THE INDOOR AIR TEMPERATURE AND RELATIVE HUMIDITY VARIATIONS THROUGH OUT A DAY WITH OUT PLANTS 43
   4.1.1. THE AIR TEMPERATURE 43
   4.1.2. THE RELATIVE HUMIDITY 46
   4.1.3. THE AIR TEMPERATURE AND RELATIVE HUMIDITY DIFFERENCE 46
   4.1.4. SUMMARY 47
4.2. THE INDOOR AIR TEMPERATURE AND RELATIVE HUMIDITY VARIATIONS THROUGH OUT A DAY WITH SCHEFFLERA ABORICOLA GREEN PLANTS 48
   4.2.1. THE AIR TEMPERATURE 48
   4.2.2. THE RELATIVE HUMIDITY 48
   4.2.3. THE AIR TEMPERATURE DIFFERENCE 51
      4.2.3.1. THE COURTYARD AIR TEMPERATURE DIFFERENCE 51
      4.2.3.2. THE 1.5m AWAY AIR TEMPERATURE DIFFERENCE 51
      4.2.3.3. THE 3.5m AWAY AIR TEMPERATURE DIFFERENCE 51
   4.2.4. THE RELATIVE HUMIDITY DIFFERENCE 56
      4.2.4.1. THE COURTYARD RELATIVE HUMIDITY DIFFERENCE 56
      4.2.4.2. THE 1.5m AWAY RELATIVE HUMIDITY DIFFERENCE 56
      4.2.4.3. THE 3.5m AWAY RELATIVE HUMIDITY DIFFERENCE 56
4.3. THE INDOOR AIR TEMPERATURE AND RELATIVE HUMIDITY VARIATIONS THROUGH OUT A DAY WITH SCHEFFLERA YELLOW PLANTS

4.3.1. THE AIR TEMPERATURE

4.3.2. THE RELATIVE HUMIDITY

4.3.3. THE AIR TEMPERATURE DIFFERENCE
   4.3.3.1. THE COURTYARD AIR TEMPERATURE DIFFERENCE
   4.3.3.2. THE 1.5m AWAY AIR TEMPERATURE DIFFERENCE
   4.3.3.3. THE 3.5m AWAY AIR TEMPERATURE DIFFERENCE

4.3.4. THE RELATIVE HUMIDITY DIFFERENCE
   4.3.4.1. THE COURTYARD RELATIVE HUMIDITY DIFFERENCE
   4.3.4.2. THE 1.5m AWAY RELATIVE HUMIDITY DIFFERENCE
   4.3.4.3. THE 3.5m AWAY RELATIVE HUMIDITY DIFFERENCE

4.4. THE INDOOR AIR TEMPERATURE AND RELATIVE HUMIDITY VARIATIONS THROUGH OUT A DAY WITH SCHEFFLERA GREEN 18 PLANTS

4.4.1. THE AIR TEMPERATURE

4.4.2. THE RELATIVE HUMIDITY

4.4.3. THE AIR TEMPERATURE DIFFERENCE
   4.4.3.1. COURTYARD AIR TEMPERATURE DIFFERENCE
   4.4.3.2. THE 1.5m AWAY AIR TEMPERATURE DIFFERENCE
   4.4.3.3. THE 3.5m AWAY AIR TEMPERATURE DIFFERENCE

4.4.4. THE RELATIVE HUMIDITY DIFFERENCE
   4.4.4.1. THE COURTYARD RELATIVE HUMIDITY DIFFERENCE
   4.4.4.2. THE 1.5m AWAY RELATIVE HUMIDITY DIFFERENCE
   4.4.4.3. THE 3.5m AWAY RELATIVE HUMIDITY DIFFERENCE

4.5. SUMMARY

4.6. SUB CONCLUSIONS

4.7. THE INDOOR AIR TEMPERATURE AND RELATIVE HUMIDITY VARIATIONS THROUGH OUT A DAY WITH CANE PALM TREES
4.7.1. THE AIR TEMPERATURE
4.7.2. THE RELATIVE HUMIDITY
4.7.3. THE AIR TEMPERATURE DIFFERENCE
  4.7.3.1. COURTYARD AIR TEMPERATURE DIFFERENCE
  4.7.3.2. THE 1.5m AWAY AIR TEMPERATURE DIFFERENCE
  4.7.3.3. THE 3.5m AWAY AIR TEMPERATURE DIFFERENCE
4.7.4. THE RELATIVE HUMIDITY DIFFERENCE
  4.7.4.1. THE COURTYARD RELATIVE HUMIDITY DIFFERENCE
  4.7.4.2. THE 1.5m AWAY RELATIVE HUMIDITY DIFFERENCE
  4.7.4.3. THE 3.5m AWAY RELATIVE HUMIDITY DIFFERENCE
4.8. THE INDOOR AIR TEMPERATURE AND RELATIVE HUMIDITY VARIATIONS THROUGHOUT A DAY WITH QUEEN PALM TREES
  4.8.1. THE AIR TEMPERATURE
  4.8.2. THE RELATIVE HUMIDITY
  4.8.3. THE AIR TEMPERATURE DIFFERENCE
    4.8.3.1. COURTYARD AIR TEMPERATURE DIFFERENCE
    4.8.3.2. THE 1.5m AWAY AIR TEMPERATURE DIFFERENCE
    4.8.3.3. THE 3.5m AWAY AIR TEMPERATURE DIFFERENCE
  4.8.4. THE RELATIVE HUMIDITY DIFFERENCE
    4.8.4.1. THE COURTYARD RELATIVE HUMIDITY DIFFERENCE
