Abstract

This thesis presents a study of deterioration and conservation of brick monuments in the ancient city of Polonnaruwa in North central province in Sri Lanka. The main objective of this research is the study of factors responsible for the deterioration of brick monuments in the old city of Polonnaruwa. The study also includes facts such as the history of bricks constructions, technology, and deterioration of brick monuments in Polonnaruwa owing to natural, environment and human actions and also the activities connected with conservation.

**Introduction**

**Chapter – 01**

**Historic city of Polonnaruwa and its brick monument**

1.1. **History of the city of Polonnaruwa**

1.2. **Brick work in the ancient city of Polonnaruwa**

1.2.1. **Brick technology of Polonnaruwa monuments**

   a) Techniques of brick construction
   
   b) Structural principles adopted in brick structures of
      Polonnaruwa
   
   c) Decorations
   
   d) Mortar us in ancient Polonnaruwa

**Chapter – 02**

**Study of brick monuments in polonnaruwa: case study**

2.1 Palace of Parakramabahu

   a) Architecture of the building
b) Structural principle adopted in building

c) Present state

2.2 Thivanka Image House

a) Architecture of the building

b) Structural principle adopted in building

c) Present state

2.3 Lankathilaka Image House

a) Architecture of the building

b) Structural principle adopted in building

c) Present state

2.4 Thuparama Image House

a) Architecture of the building

b) Structural principle adopted in building

c) Present state

Chapter – 03

Identification of the causes of decay in brick monument of Polonnaruwa

3.1. Roof

3.1.1. Natural cause of decay in roof

3.1.2. Environment case of decay in roof

3.1.3 Manmade causes of decay in roof

3.2. Walls and Plaster

3.2.1. Natural cause of decay in walls and plaster

3.2.2. Environment cause of decay in walls and plaster

3.2.3. Intervention of man on the deterioration of brick walls and plaster in monuments
3.3. Foundation

3.3.1. Natural cause of decay in foundation 191
3.3.2. Environmental causes of Decay 192
3.3.3 Man made cases of Decay in Foundation 194

Chapter – 04

Proposal four conservation of brick monument in Polonnaruwa 195

4.1. Causes of deterioration of brick Monuments in Polonnaruwa 195
4.2. Principles of conservation pertaining to brick monuments 196
4.3. Proposal four conservation of brick monument in Polonnaruwa 196

4.3.1. Proposal for conservation of brick monuments from natural causes of decay. 208
4.3.2. Proposal for conservation of brick monuments from environmental causes of decay. 209
4.3.3. Proposal for conservation of brick monuments from man – mode causes of decay. 217

Acknowledgment

Numerous persons have helped me in various ways since the beginning of this study which consumed a number of years. I must take this opportunity of recording my deep sense of gratitude to all of them.

First of all I wish to express my profound gratitude to my teacher’s senior professor Nimal de Silva and Professor Samitha Manawadu of the faculty of Architecture university of Moratuwa, who always gave me their valuable guidance by encouraging and by putting me to the correct path from the beginning of the study up to its end.

I would like to extend my grateful thanks to Mr. C.J. Seram, former Director of course and Senior lecturer, Mr. D.P. Chandrasekara, senior lecturer, and to all the staff members, and to by giving me technical advice I needed. My special thanks go to Mr. Precil De Mel for his kind help given me to during the course.

My thanks also go to two of my colleagues, Nissanka and Chinthaka who worked very hard during day and night by collecting necessary data with me in the field work that we carried out at monuments, and all my family members who always encourage me in my study.
