ACKNOWLEDGEMENT

This study would not have been success without the guidance, kind cooperation, assistance and intellectual support of a number of authorities and individuals. It gives a great pleasure to express the authors' gratitude to those here.

Professor Nimal De Silva Head of the Department of Architecture, Dr. Samitha Manawadu my tutor for his guidance, comments, and valuable criticism, who helped me much by giving pace to develop my thoughts and an approach to this study. I am extremely grateful for his help and appreciate the time and efforts extended to me to carry out the study.

Archt. Wasana Wijesinghe and Archt. Damith Fernando senior lecturers to whom I am grateful for their encouragement offered at the onset of the study. Special thanks to Dr. Janake Wijesundara ,Urban Development Authority for providing information ,valuable criticism and advices to improve the quality of this work to a substantial degree.

I am grateful to Waruni, Imali Nangi and my colleagues for their advice and encouragements. Specially to my parents, Aiya and Malli for their whole hearted support. Say no more as words can hardly express in any real measure the help they have given.
