

Bibliography

1. Borthwick, A.G.L., and Joynes, S.A., *The behavior of an oil slick subjected to near shore circulation*, Department of Civil Engineering, Report No.88/221, University of Salford, UK, October, 1998.
2. David Scullen, *Finite Difference Methods for advection in variable velocity fields*, Honors Thesis, The University of Adelaide, pp 1-20, 1992
3. Falconer, R.A., *Mathematical Modeling of Jet-Forced Circulation in Reservoirs and Harbors*, PhD Thesis, Imperial College, London, PP 31-94,1978.
4. Gala Patti R., Samarawickrama S.P., Hettiarachchi S.S.L.H., Jayaweera M., Fernando M.M.G.S., Kumuthini S., Wijesekera G.N., Welhena T., Golmen L.G., Sunnfjord A., INSTCOM Task 3, *Assessment of Risk of Oil Spill Damage to Specific Coastal Areas and Resources*, Marine Pollution Prevention Authority , Sri Lanka, May 2003.
5. Hester, R.E., and Harrison, R.M., *Risk Assessment and Risk Management*, Royal Society of Chemistry, Saraee Park, Cambridge, 1998.
6. International Maritime Organisation, London, *Manual on Oil Pollution - Section II: Contingency Planning*, IMO Publication, London, 1995
7. International oil Pollution Compensation Fund, *IOPC Fund report on the activities of the international oil pollution compensation funds in 2003*, Impact PR of Design Limited, Great Britain, 2004.
8. Jayathilake A., Siriwardena P. P. G. S. N., Dharmawardena S., Wickremgamage P., Jayamanne S.C., Sørensen J., INSTCOM Task 2, *Environmental Sensitivity Index (ESI) Mapping and Classification of Shorelines & Bio-resources and User-interests that are Sensitive to Oil Spill Pollution from Maritime Activities in Sri Lanka*, Marine Pollution Prevention Authority , Sri Lanka, May 2003.
9. Jonathan, D.K and Murrey, E.L., *Emergency Incident Risk Management*, International Thomson publishing Inc, New York, 1996.
10. Nick, W.H., *Risk Assessment- The Human Dimension*, The Royal Society of Chemistry, Great Britain,pp 66-70, 1998.
11. Applied Science Associates Incorporation, *OILMAP user manual*, Applied Science Associates Incorporation, Rhodes Island, version 4.0,1999.
12. Randy Belore, the SL Ross spill fate and Behavior Model, SL Ross Environmental Research Ltd, Canada, 2001.

13. S.L.Ross Environmental Research Ltd and D.Mackay Environmental Research Ltd, *Laboratory studies of the behavior and fate of waxy crude oil spills*, Environmental Research Funds, Report 084, 1988.
14. Samaranayake O. L., Pedersen G., INSTCOM Task 6, *Oil spill combat and clean up capacities – evaluation and strengthening Input and output data of the oil drift model – action plan and check list*, Marine Pollution Prevention Authority , Sri Lanka, May 2003.
15. Tkalich, P., Cliao Xiaobo, *Accurate simulation of oil slicks*, 2001 International oil spill conference, API Washington D.C, PP.1133-1137, 2001.
16. Wang, S and L.Hwang, *A Numerical Model for Simulation of oil spreading and transport and it's Application for predicting oil slick Movement in Bays*, Tetra technical Report, pp345-74-1, February 1974.
17. Weerakoon D., Jayatunga A., Bakke T., INSTCOM Task 4, *Oil Spill Impact Assessment and Establishment of Ecological Baseline and Monitoring Programs*, Marine Pollution Prevention Authority , Sri Lanka, May 2003.
18. Wijeratne M.N.T, *Oil spill trajectory model for the Gulf of Thailand*, MSc. Thesis, Asian Institute of Technology, Thailand, April1997. PP 3 - 22.
