CONTENTS

Acknowledgement	V
List of Figures	VI
Introduction	XII
CHAPTER 1	
Introduction of Vaastu	1
1.1 History of Vaastu	1
1.1.1 Essence of Vaastu	2
1.1.2 Characters of science	3
1.2 The laws of nature and Vaastu	4
1.2.1 Solar science	5
1.2.2 Magnetic field of earth	6
1.2.3 Gravitational force	6
1.2.4 Wind	6
1.2.5 Cosmic Rays	7
CHAPTER 2	
Environmental factors that affect Vaastu	9
2.1 Physical features	9
2.2 Individual effects of different physical features	9
2.2.1 Hills and raised spaces	9
2.2.2 Trees	11
2.2.3 Light	11
2.2.4 Water bodies	12
2.3 Neighborhood	14
2.3.1 Temples	14
2.3.2 Pillars	15
2.3.3 Tall Buildings	15
2.3.4 Bigger plots	16
2.3.5 Large open spaces	16
2.3.6 Garbage disposal lands	17
2.3.7 Electricity box and transformer box	17
2.3.8 Parajala Vedhai	17
2.3.9 Compound wall	17
2.3.10 Common wall	18
2.3.11 Neighbors house	18
2.3.12 Wells	19
2.3.13 Cemeteries	19
2.3.14 Public spaces	19
2.3.15 Roads	20
CHAPTER 3	
Selection of the plot	24
3.1 The soil	24
3.1.1 Living or dead soil	24

3.1.2	Water content in soil	25
3.1.3	Density of soil	26
3.1.4	Color of soil	26
3.1.5	Fertility of soil	27
3.2	The slope of the land and effects	27
3.2.1	Principles of balancing weights	27
3.2.2	The slope	28
3.2.2.1	Akra Bhoomika Vedhai	28
3.2.2.2	Slope towards center	29
3.2.2.3	Slope towards individual directions	29
3.3	Raised spaces within the plot	30
3.4	Depressions	31
3.4.1	Unaccepted depressions within the plot	31
3.4.2	Accepted depressions within the plot	31
3.4.3	Bhoomi Vedhai	32
3.4.4	Vastu	34
3.4.5	Prastha	38
3.4.6	Rainwater exits	39
3.5	Shape of the plot	41
3.6	Angles at borders	49
3.6.1	Corrections of angles in a plot	49
3.6.2	Deformation of shapes	50
3.6.2.1	Extension	51
3.6.2.2	Expansion	52
3.6.2.3	Retraction	53
 CHAPTER 4		
Zoning of the plot		
4.1	Open spaces within the plot and their effects	56
4.1.1	More open spaces	56
4.1.2	Less open spaces	58
4.2	Depressions	59
4.2.1	Well	59
4.2.2	Water sump	61
4.2.3	Septic tank	62
4.2.4	Sheds for pets and farm animals	62
4.2.5	Toilets and bathrooms	63
4.2.6	Car park	65
4.2.7	Locating building on the plot	67
4.2.7.1	Brakhma Pada	68
4.2.7.2	Devika Padam	68
4.2.7.3	Manushya Padam	68
4.2.7.4	Pisacha Padam	68
4.2.8	Buildings on the border	69
4.2.9	Placing main building within the plot	69

4.3	Formation of the building	69
4.3.1	Design process of the building	69
4.3.2	The process of creating form	70
4.3.3	Plan forms that are accepted in Vaastu	71
	4.3.3.1 Shape of the building	71
	4.3.3.2 Classification of the building according to the number of wings	72
	4.3.3.3 Growth and reduction of the building	74
4.3.4	Zoning the building for different functions	75
	4.3.4.1 Bedroom	77
	4.3.4.2 Kitchen	78
	4.3.4.3 Dining room	78
	4.3.4.4 Prayer room	79
	4.3.4.5 Study room	80
	4.3.4.6 Treasury room	80
	4.3.4.7 Bathroom and toilets	80
4.3.5	Entrances	81
	4.3.5.1 Entrance to the building	81
	4.3.5.2 Kuthu or Shoola within the plot	82
	4.3.5.3 Rules relating to doors	82
	4.3.5.4 Important factors when selecting timber	83
	4.3.5.5 The direction of Utchcham and Neecham	84
	4.3.5.6 The factors considered when locating a door	85
	4.3.5.7 Different locations of positioning the door	86
4.3.6	Windows	87
4.3.7	Floor levels	88
4.3.8	Rules related to walls	89
4.3.9	Positioning of the staircase	89
4.3.10	Locating verandahs and balconies	89

CHAPTER 5

Scientific value of Vaastu and case studies	91	
5.1	What is the scientific method?	91
5.2	Common phenomena's affecting Vaastu rules	92
	5.2.1 Magnetism	94
	5.2.2 Electromagnetism	94
	5.2.3 Gravity	96
	5.2.3.1 Newton's law of gravitation	97
	5.2.4 Sunlight and it's importance in Vaastu	99
	5.2.5 Properties of waves	100
5.3	Well hydraulics	101
5.4	Temple of the Tooth Relic Kandy (Dalada Maligawa) – Case Study I	103
5.4.1	The effects of Vaastu in the Dalada Maligawa in Kandy	106
	5.4.1.1 Neighborhood	106
	5.4.1.2 The main entrance and positioning of other doors	107
	5.4.1.3 Plan form	114
	5.4.1.4 Orientation	114

5.4.1.5	The design of doorways	115
5.4.1.6	Positioning of columns and pillars	115
5.4.1.7	Staircases	118
5.4.1.8	Positioning of the Tooth Relic	118
5.4.1.9	The roof form	118
5.5	The New Parliament complex at Sri Jayawardenapura Kotte - Case Study II	119
5.5.1	The effects of Vaastu on the New Parliament complex	121
5.5.1.1	The surrounding	121
5.5.1.2	Shape of the plot	122
5.5.1.3	Main entrance to the plot	123
5.5.1.4	Location of buildings on the plot	123
	Conclusion	127
	Bibliography	129

Acknowledgements

A number of people have made this work possible. Among them were people connected directly to the subject matter while some were helpful in different other ways. My tutor Mr. Jayanath De Silva provided me with the guidance required to complete the work. Mr. Sujeewa Egodawatte, who is an expert in Vasstu, helped me with his knowledge and also devoted much of his precious time educating me. Mr. Ranjit Madanayake and Kusum Madanayake together with Mrs. Lila Gamage helped me to edit the book. My husband, Nanditha devoted much of his time in preparing the layout together with all graphic formulation for the final print. My thanks also go to Mr. Ruwan, who is in charge of the Faculty reading room and to my parents and sister for encouraging me continuously. Last but not least, I also extend my special thanks to the following persons.

Prof. Nimal De Silva
Dean,
Department of Architecture,
University of Moratuwa.

University of Moratuwa, Sri Lanka.
Electronic Theses & Dissertations

Dr. Manawadu,
Department of Architecture,
University of Moratuwa.

Archt. Vidura Sri Nammuni,
Head of Department,
Department of Architecture,
University of Moratuwa.

Mr. Upendra Rajapakse
Lecturer,
Department of Architecture,
University of Moratuwa.

List of figures

Number	Description	Page
Fig 1 :	The Earth	2
Fig 2 :	The power distribution pattern on the plot	6
Fig 3 :	Center of gravity of the plot	6
Fig 4 :	Directions of power lines due to magnetism	8
Fig 5 :	Accepted raised zones in the plot	9
Fig 6 :	Trees acting as a filter for negative sun rays	11
Fig 7 :	Accepted zones for water bodies	12
Fig 8 :	Accepted settings for plots adjacent to rivers	14
Fig 9 :	Inappropriate settings of temples adjacent to a plot	14
Fig 10 :	Devantha Vedhai	15
Fig 11 :	Stamba Vedhai	15
Fig 12 :	Plot between two tall buildings	16
Fig 13 :	Plot between two large plots	16
Fig 14 :	Accepted zones for large open spaces	16
Fig 15 :	Accepted zones for garbage disposal	17
Fig 16 :	Accepted zones for electricity box and transformer	17
Fig 17 :	Suitable setting for compound wall	18
Fig 18 :	Gap to be placed between compound wall and common wall	18
Fig 19 :	Suitable zones for wells	18
Fig 20 :	North – East suitable for the water sump	19
Fig 21 :	Plots facing individual directions	20
Fig 22 :	Plot facing double roads	21
Fig 23 :	Plot facing opposite roads	21
Fig 24 :	Plot facing triple roads	22
Fig 25 :	Roads along all sides of the plot	23
Fig 26 :	Effect of vibrations on the building due to height difference of the road	23
Fig 27 :	Plants that grow on dead soil	25
Fig 28 :	Categories of weight zones in the plot	27
Fig 29 :	Akrabhoomika Vedhai	28
Fig 30 :	Slope towards a center of a plot	29

Fig 31 :	Sloping of the plot towards the East	29
Fig 32 :	Accepted raised spaces in individual zones	30
Fig 33 :	Unaccepted raised zones in individual directions	30
Fig 34 :	Unaccepted depressions in individual directions	31
Fig 35 :	Accepted depressions in individual directions	31
Fig 36 :	Bhoomi Vedhai	32
Fig 37 :	Jala Vedhai	32
