Acknowledgements

This project owes much to the assistance and guidance given by the tutors in the academy as well as to the encouragement and support given by family and friends, to all of whom I would like render my sincere vote of gratitude.

Firstly I would like to place my gratitude and thanks to Arch. Prof. S Manawadu, the head of the department of Architecture, for devoting time for us to discuss and plan the dissertation with him, and the inspiration and initial encouragement given to us throughout the fifth year.

I would like to express my profound gratitude to Arch. Prof. Lal Balasuniya, for devoting his valuable time, to discuss the case studies and for his guidance and imperative opinions to make this dissertation a success.

It is with great pleasure that I render a vote of gratitude towards my Dissertation tutor, Archt. Sudharshana Wijegunawardena, for his guidance, opinions, criticisms, and encouragements without which this dissertation would have never seen an end to.

I would also like to thank Archt. (Dr.) Harsha Munasinghe, for his guidance and opinions both as the Year master and as the dissertation coordinator.

I am very much grateful to our year master Arch Jayanath Silva for the invaluable advice and for his patient understanding, which helped us immensely to make this dissertation a success.

A heartfelt word of gratitude also is due to Archt. (Dr.) Jagath Munasinghe, who encouraged and guided me from the inception in achieving my goal.

I take this opportunity to thank Archt. (Dr.) Upendra Rajapakse who from the beginning, made critical comments and for the encouragement given.

I very much thank Archt. Upendra Randeniya and Archt. Susira Udalamatte, for their guidance and critical comments.

I consider it a privilege also to thank the lady at the reference library who had the patience to photocopy large amounts books for me when ever I asked, without complaint.

I would also like to extend my deepest gratitude towards the Superintendent of Police, Presidents Security Division, D.P Wijeratne for granting me permission in order to take photographs in the High security zone.

I would like to thank all my colleges, especially, Sharmalie, Ubhaya, Chandana, Tharanga and Janaka

I would like to thank Tilanka for all the support, encouragement, "Thoughtful words", and inspiration, but mostly for making the world seem brighter than it really was. Thank you.

Last but definitely not the least, I thank my parents for without whom, none of this would have ever been possible. Your guiding light shines far beyond comprehension. Thank you.

INTRODUCTION		1
a.	Observation	
b.	Topic explanation	
c.	The need and Intentions of the study	
d.	Scope and limitations of the study	
e.	Methodology	
CHAPTER ONE	POSITIVE SPACE VS LOST SPACE	
	Preface	5
1.1	Positive space – A definition	6
	1.1.1 Perceiving positive space	6
	1.1.2 Attributes of positive space	7
	1.1.2.1 Physical attributes	7
	1.1.2.2 Social attributes	8
	1.1.3 The image of positive space	9
	1.1.4 Positive urban public spaces	10
	1.1.4.1 Streets	13
	1.1.4.2 Squares	15
	1.1.4.3 Water fronts	16
1.2	Lost space defined	19

CHAPTER TWO - LOST SPACE: CAUSATIVE FACTORS, CHARACTERISTICS AND ITS POTENTIALS

	Preface	22
2.1	Implications in the development of Contemporary Urban Space	23
2.2	The causative Factors of Lost space	26
2.3	Spatial Characteristics of Lost space	30
	2.3.1 Physical Characteristics	30
	2.3.1.1 Non- Responsive Urban form	30
	2.3.2 Social Characteristics	34
	2.3.2.1 Lost Dimension of Human participation	34
	2.3.2.2 Anti-social activity space	38
	2.3.2.2 Psychological Characteristics	39
2.4	Lost space; Potential of redeveloping as creative urban in fills	40

CHAPTER THREE - REDESIGNING LOST SPACES

	Preface	42
3.1	Aims of redesigning lost spaces	43
3.2	Approaches of redesigning urban lost space	44
	3.2.1 Critical reactions against isolated spatial design	44
	3.2.2 Principles underlying integrated spatial design	50
	3.2.2.1 Figure-ground Theory	50
	3.2.2.2 Linkage theory	56
	3.2.2.3 Place theory	62
3.3	Frame work of redesigning lost spaces	63
	3.3.1 Response to the context	63
	3.3.1.1 Architectural response	64
	3.3.1.2 Functional / social response	69

3.3.2	Establish and strengthen to achieve positive linkages	70
3.3.2.1	Physical linkage	70
3.3.2.2	Functional linkage	70
3.3.2.3	Visual linkage	70
3.3.3	Controlling the relationships of urban fabric	70
3.3.3.1	Change the meaning of place	70
3.3.3.2	Change the function	72
3.3.3.3	Change the physical geometry	72
CHAPTER FOUR	- EXPERIENCING REDESIGNING LOST SPACES IN CONTEMPORARY URBAN SITUATIONS	
	Preface	73
4.1	Insight of Urban development in Sri Lanka	74
4.2	Urban revitalization of Echelon square	75
	4.2.1 Historical overview of Echelon square, Fort	75
	4.2.2 Redevelopment strategies adopted	80
	4.2.3 Echelon square in present context	85
	4.2.4 Conceptual Design Interventions	89
4.3	Beira Lake redevelopment	94
	4.3.1 Historical overview of Beira Lake	94
	4.3.2 Beira lake in present context	98
	4.3.3 Implemented redevelopment strategies	104
	4.3.4 Conceptual Design Interventions	111
	Conclusion	114
	Bibliography	116
