Abstract

The world has come to the verge of a revolution that is just as profound as the change in the economy that came with the industrial revolution. Soon electronic networks will allow people to transcend the barriers of time and distance and take advantage of global markets and business opportunities, opening up a new world of economic possibility and progress. With Internet's booming, airlines' business has been greatly changed.

This study is focused on measuring the intention to purchase air tickets using Internet reservation system and finding out the factors that influence intention. Data was initially gathered through interviews. This study integrates constructs from the United Theory of Acceptance and Use of Technology Model, Transaction Cost Saving, Perceived Risk and Perceived Enjoyment. A survey was administered to 128 Sri Lankan passengers in Bandaranaike International Airport who were experienced and inexperienced with such systems.

 According to the results obtained it can be clearly concluded that the intention levels of using Internet Reservation Systems by airline passengers in Sri Lanka are at a higher level. The results also indicate that Performance Expectancy, Effort Expectancy, Social Influence, Facilitating Conditions, Time Saving, Price Saving, Perceived Enjoyment and Perceived Risk have a significant effect on airline passengers' intention to use Internet reservation systems.

Electronic Theses & Dissertations
www.lib.mru.ac.lk

The study concludes with a list of recommendations that the researcher sees as suitable for the airline sector in Sri Lanka to adopt in order to improve the usage of Internet reservation systems and thereby improve on the services provided. Airlines and tour operators can implement more successful Internet based reservation systems by considering the findings of this research.

Key words: Reservation Systems, UTAUT, Airlines, Intention, Perceived Risk, Transaction Cost

Acknowledgment

I wish to express my deep gratitude to all those who have helped me in successfully completing my research study on “Factors Influencing the Adoption of Internet Reservation Systems by Airline Passengers in Sri Lanka”.

First and foremost, I wish to thank, the research supervisor, Mr. Shantha Fernando, Senior Lecturer, Department of Computer Science and Engineering, for the assistance and guidance provided ever since the beginning of the project. I am very grateful for all encouragement given in various regards and the valuable ideas given throughout the study.

Further I wish to convey my special gratitude to Airport and Aviation which gave me permission to collect information for my study. The unfailing courtesy and corporation given by the management and IT professionals of the airlines, by participating in interviews and by answering lengthy questionnaires are very much appreciated.

Particular thanks also due to the Head of Department, Mrs. Vishaka Nanayakara, our coordinator for the programme, Dr. Chandana Gamage and the academic and non-academic staff of Department of Computer Science and Engineering, University of Moratuwa for the guidance and resources given to me.

Furthermore I would like to convey my sincere thanks to the management and my colleagues in Sri Lankan Airlines for their assistance regards to my research study. Also a special note of thanks is due to my wife, Sumali for all the encouragement and unconditional support and corporation given throughout this effort.

Finally I wish to convey my heartfelt thanks for all those who have helped me in this effort whose names have not been mentioned above.

Declaration.....	i
Abstract.....	ii
Acknowledgment.....	iii
List of Tables	vii
List of Figures.....	x
CHAPTER 1: INTRODUCTION.....	1
1.1 Overview.....	1
1.2 Background.....	2
1.3 Motivation.....	3
1.4 Problem Discussion	4
1.4.1 Problem Statement.....	6
1.4.2 Research Question	6
1.4.3 Research Objectives.....	7
1.5 Practical and Theoretical Value of this Research	7
1.6 Outline of the Thesis.....	9
CHAPTER 2: LITERATURE REVIEW.....	10
2.1 E-Commerce in Airline Business.....	10
2.2 Airline Reservation Systems.....	12
2.3 The Internet Travel Industry	14
2.3.1 Internet and the Travel and Tourism Industry	15
2.3.2 Internet and the airline Industry	16
2.3.3 Internet and disintermediation in the travel industry	18
2.4 Theoretical Framework.....	20
2.4.1 Theory of Reasoned Action	21
2.4.2 Theory of Planned Behavior	23
2.4.3 Technology Acceptance Model	24
2.4.4 Unified Theory of Acceptance and Use of Technology	26
2.4.5 Transaction Cost Analysis	30
2.4.6 Perceived Enjoyment	33
2.4.7 Perceived Risk	33

CHAPTER 3: METHODOLOGY	35
3.1 Research Purpose	35
3.2 Research Model	36
3.2.1 Conceptual Framework	37
3.2.2 Research Hypotheses	38
3.3 Research Approach	42
3.3.1 Quantitative versus Qualitative Research Approach	42
3.3.2 Inductive versus Deductive Research Approach	44
3.4 Research Strategy	45
3.5 Research Design	47
3.5.1 Research Instruments	47
3.5.2 Operationalising the variables	48
3.6 Sampling Design	49
3.6.1 The Population	49
3.6.2 Sample Selection	53
3.6.3 Sampling procedure of Airlines	53
3.6.4 Sampling procedure of passengers	54
3.7 Data Collection	55
3.7.1 Interviews with airline staff	56
3.7.2 Questionnaire Development	56
3.8 Quality, Descriptive and Statistical Analysis	58
3.8.1 Checking Reliability and Validity	58
3.8.2 Descriptive Analysis	59
3.8.3 Statistical Analysis	59
CHAPTER 4: DATA ANALYSIS & RESULTS	60
4.1 Overview of the Sample	60
4.2 Reliability and Validity	60
4.2.1 Reliability	61
4.2.2 Validity	63
4.3 Descriptive Analysis	63
4.3.1 Composition of the Sample	63
4.3.2 Descriptive Analysis of Concept and Construct Variables	67
4.3.3 Overall Summary of Research Constructs	97
4.4 Statistical Analysis	97

4.4.1	Intention to Use Internet Reservation Systems.....	98
4.4.2	Relationship between Performance Expectancy and Intention.....	99
4.4.3	Relationship between Effort Expectancy and Intention.....	100
4.4.4	Relationship between Social Influence and Intention.....	101
4.4.5	Relationship between Facilitating Conditions and Intention.....	102
4.4.6	Relationship between Time Saving and Intention.....	103
4.4.7	Relationship between Price Saving and Intention.....	104
4.4.8	Relationship between Perceived Enjoyment and Intention.....	105
4.4.9	Relationship between Perceived Risk and Intention.....	106
4.5	Overall Results of the Study.....	107
CHAPTER 5: RECOMMENDATIONS & DISCUSSION.....		109
5.1	Recommendations to improve the current usage of Internet Reservation Systems by Sri Lankan passengers.....	109
5.2	Discussion on the Adoption of Internet Reservation System by airline passengers.....	120
CHAPTER 6: CONCLUSION.....		126
6.1	Significance of the Study.....	126
6.2	Research Findings.....	127
6.2.1	Objective 1: To measure the "intention" level of using Internet Reservation Systems among airline passengers.....	127
6.2.2	Objective 2: To identify the significant factors that influence the intention of using Internet Reservation Systems.....	127
6.2.3	Objective 3: Provide recommendations that can be used to improve intention and usage of Internet Reservation Systems.....	128
6.3	Limitations of this Study.....	129
6.4	Further Research.....	130
