

ACKNOWLEDMENT

During my research project many individuals helped, assisted and gave their fullest co-operation what so ever to make this research project a success; therefore, researcher would like to thank all of them. First of all researcher would like to thank Dean of the Faculty of engineering Prof. A.K.W. Jayawardena and Head of the Department of Civil Engineering University of Moratuwa Prof. Mrs. N. Ratnayake for the opportunity given to follow the M.Eng Degree course on Structural Engineering Design.

Researcher thanks course coordinator of M.Eng./P.G. Diploma in structural engineering design Dr. (Mrs.) M.T. Premini Hettiarachchi, senior lecture Department of civil engineering for her valuable guidance, encouragement and assistance extended during the research project.

Without having financial assistance, it was not easy task of following a M.Eng./P.G. Diploma in structural engineering design course; therefore, researcher thanks Director and staff of the North Western Province Engineering Department for their great co-operation throughout the duration of course.

Researcher's special thank goes to supervisor of the project Prof. M.T.R. Jayasinghe, Professor, Department of Civil Engineering, University of Moratuwa for his dedication, commitment, great encouragement, tireless effort and assistance extended during this research project. Finally, researcher would like to thank all the academic

staff who delivered their valuable knowledge and spent time during the course of study leading to M.Eng. in Structural Engineering Design.

Researcher also offers his sincere thanks for lecturers Eng. N.C.T. Peiris and Eng. (Ms.) Thanuja Peiris of faculty of engineering University of Moratuwa for their assistance in many ways and extended co-operation during the research project.

	PAGE
Abstract	I
Acknowledgement	II
Contents	V
Chapter 1- Introduction	1
1.1 General	1
1.2 Main Objective	3
1.3 Methodology	4
1.4 Main findings	5
1.5 Arrangement of the report	7
Chapter 2- Literature Review	8
2.1 Introduction	8
2.2 Foundation types of low media	9
2.3 Foundation design methods	20
2.4 Inverted T and its design	45
2.5 Summary	46
Chapter 3- Procedure	47
3.1 Introduction	47
3.1.1. Foundation	47
3.1.2 Ground Beam	48
3.1.3 Columns and Inverted T beam	48
3.1.4. Loads	48
3.1.5. Slabs	49
3.1.6 Beams	49
3.1.7. Reactions	49
3.1.8 Analysis as rigid soil	49
3.1.9 Elastic Analysis	51
3.1.9.1 Calculation of Spring Constant	55

Chapter 4- Results & Discussion	87
Chapter 5- Conclusion & Future work	169
