Dr. A.A.D.A.J Perera
Department of Civil Engineering,
University of Moratuwa.

Acknowledgement

First of all, I would like to express my sincere gratitude to Dr. A.A.D.A.J Perara, my research supervisor for the assistance, guidance, encouragement and kindness extended to me throughout the M.Sc. programme. Also I wish to extend a similar gratitude to Dr L.L Ekanayake, Dr R U Halwatura and other academic staff of Department of Civil Engineering for the corporation extended during the programme. I shall also thank the non-academic staff at the Department of Civil Engineering for the invaluable assistance and coordination provided during this period.

Then I would like to acknowledge the kind cooperation, assistance and patience shown by the members of the staff of Non-Revenue Water Reduction Department and Rural Water Supply Department of the National Water Supply & Drainage Board during the course of Research Programme. I greatly appreciate their invaluable time and energy spared to assist me in developing the research framework and questionnaires, without which this report might have been impossible.

Also, I wish to scribe an open note of thanks to all those who helped me in numerous ways to see a successful end to my efforts to realize this report.

Last but not least, my most adorable thanks goes to my three year old little girl, who took the most pain to let me have some free time to attend to the M.Sc programme. Also a similar gratitude needs be noted here for the patience and cooperation extended by my wife and rest of the family.

A.D.K.K Wijayagunawardana,

January 2009.

Declaration	ii
Abstract	iii
Acknowledgement	v
List of Tables	ix
List of Figures	xi
1 Introduction:.....	1
1.1 Background	1
1.2 Community Water Systems in the World.....	3
1.3 Community Water Systems in Sri Lanka.....	6
1.4 Problem Statement	8
1.5 Research Objective.....	9
1.6 Research Approach.....	10
1.7 Scope and Limitations.....	10
1.8 Guide to Report	10
2 Literature Review.....	12
2.1 Introduction	12
2.2 Performance Evaluation in Community Water Systems.....	13
2.3 Use of Indicators as Policy Tools.....	15
2.4 Problems in Use of Indicators	17
2.5 Identification and Selection of Indicators for Water Supply Systems	20
2.6 Criteria for Selection of Indicators.....	22
3 Research Methodology	24
3.1 First Stage Survey	25
3.2 Selection of Performance Indicator and Categories from First Stage Survey.....	26
3.2.1 Service Coverage Performance.....	26
3.2.2 Water Consumption and Production Performance.....	27

3.2.3	Non-Revenue Water Performance	27
3.2.4	Metering Practices Performance	28
3.2.5	Piped Network Performance	28
3.2.6	Costs and Staffing Performance.....	29
3.2.7	Service Quality Performance	29
3.2.8	Billing and Collection Performance.....	30
3.2.9	Financial Performance	30
3.2.10	Stock Control Performance	30
3.2.11	Assets Performance.....	31
3.2.12	Gender Performance	31
3.2.13	Accountability to Stakeholders Performance.....	31
3.3	Indicators to be explored under each Category	34
3.4	Second Stage Survey for Ranking & Scoring	45
3.5	Calculation of Composite Performance Index Value from Indicators	47
3.6	Conversion of Incompatible Indicator Units into Uniform Scale of 0 – 100	49
4	Data Collection, Analysis and Development of CPIV	54
4.1	Data Collection.....	54
4.2	Data Analysis	54
4.2.1	Summarizing Format for Responses from Research Survey	58
4.2.2	Analytical Summary of Research Responses.....	59
4.3	Development of CPIV	91
4.3.1	Mathematical Explanation of the Composite Index for Evaluation of CWS.....	91
5	Conclusion, Recommendations and Further Research	101
5.1	Conclusion.....	101
5.2	Recommendations and Future Research	102
6	References	104
