The above particulars are correct to the best of my knowledge.

Signature of the Supervisor Date _____

ABSTRACT

The software industry is one of the fastest evolving industries. The change is so rapid that all the stakeholders, who interact with the software industry, need to be ready for any change taking place, in order to survive in the global market. Since the software industry is knowledge driven, employees are the driving force of its success. As a result organizations need to make sure their employees are capable of handling or facing any challenge within the industry. Today, most of the industries have experienced skills gaps or skill shortage issues, worldwide and are trying to find solutions to mitigate it. It has become a predominant problem to the software industry.

The purpose of this study is to conduct an analysis of the skills gaps, existing in the Sri Lankan software industry, to the benefit of all the stakeholders. It is focused on identifying factors that cause the skills gaps, their significance and skill deficiencies exist among employees, for programming & software engineering, testing & quality assurance and technical support job categories. Technology change, working experience and acquired training level were identified as the major factors to carry out a significant study of them, with respect to the existing skills gaps among employees in the industry. Skills gaps were identified in terms of soft skills, technical skills and core skills, according to each job category. Two questionnaires were used to collect data from non-managerial and managerial employees. The sample is then examined to get the results.

The results of this study indicated that technology change has the most significant influence on the existence of the skills gaps among the three factors. Also it proved that the lack of working experience and the lack of training level have impacted on the existence of the skills gaps among employees, in the Sri Lankan software industry. In addition to that the study revealed a set of skills (soft, technical, core) lacking among employees, for each job category. Finally the study concludes with a list of recommendations that organizations, individuals and the government can adopt, in order to mitigate the skills gaps in the Sri Lankan software industry.

ACKNOWLEDGEMENT

This dissertation would not have been reality without the backing and cooperation from various individuals through various means. It is a pleasure to thank those who made this thesis possible after a more than eight months of work.

First and foremost I owe my everlasting gratefulness to my supervisor Dr. Chandana Gamage, Department of Computer Science & Engineering, University of Moratuwa who provided invaluable guidance and advices from beginning to the end.

I also thank Dr Anura Ekanayake, Chairman, Ceylon Chamber of Commerce for giving his opinions for my research at the initial stage.

I further extend my deepest gratitude to Mrs Vishaka Nanayakkara, head of the department of Computer Science & Engineering and the non-academic staff of the department for giving their support and the guidance.

I deeply cherish the colleagues and the management of Navantis IT (Pvt) Ltd for being flexible and cooperative throughout my research.

I also thank Damith Pathirage for providing me the required resources to carry out the research successfully.

Special thanks go to my batch mates who helped me in obtaining interviews and in the distribution and collection of data while completing their own research.

Also big thank goes to my parents and brother for the patience and sacrifice that had to be made in order to make this a reality.

And last but not least, I would like to show my gratitude to Chamara Wickramanayaka, for the constant support and encouragement given while doing his own research.

TABLE OF CONTENTS

DECLARATION	ii
ABSTRACT	iii
ACKNOWLEDGEMENT	iv
LIST OF FIGURES	viii
LIST OF TABLES	ix
CHAPTER 1: INTRODUCTION.....	1
1.1 Background	1
1.2 Motivation	1
1.3 Problem Studied	2
1.4 Research Objectives	3
1.5 Significance of the Study	3
1.6 Research Methodology	4
1.7 Nature & Form of Results.....	5
CHAPTER 2: LITERATURE REVIEW	6
2.1 Definition of Skill.....	6
2.2 Definition of Skills Gap.....	6
2.3 Prevalence of Skills Gap.....	7
2.4 Impact of the Skills Gap	8
2.5 Empirical Skills Gap Analysis in the World.....	11
2.5.1 Skill Gaps in the World's IT Workforce	11
2.5.2 Regional ICT Manpower and Skills Survey.....	12
2.5.3 Information Technology Workforce Capability Assessment	13
2.5.4 National Employers Skills Survey	13
2.6 Factors Causing the Skills Gap	14
2.7 Summary	16
CHAPTER 3: RESEARCH METHODOLOGY	17
3.1 Measuring Skills Gap	17
3.2 Identifying the Type of Audience.....	18
3.3 Conceptual Framework.....	18
3.3.1 Hypothesis Formulated.....	22
3.4 Research Design	23

3.4.1 Research Instruments	23
3.4.1.1 Questionnaires	24
3.4.1.2 Interviews	25
3.4.2 Defining Skills Set	25
3.4.3 Operationalization of Variables	28
3.5 Data Collection Methods	29
3.5.1 Questionnaires.....	29
3.5.2 Interviews	30
3.6 Determining Population & Sample Size	30
3.6.1 The Population	30
3.6.2 Sample Size	31
3.7 Data Analysis	31
CHAPTER 4: RESULTS OF DATA ANALYSIS	32
4.1 Reliability Analysis	33
4.2 Descriptive Analysis of Construct Variables	34
4.2.1 Technology Change.....	34
4.2.2 Working Experience.....	37
4.2.3 Acquired Training Level	38
4.2.4 Skills Gap	41
4.3 Statistical Analysis	44
4.3.1 Hypothesis Testing.....	44
4.3.1.1 Hypothesis I.....	44
4.3.1.2 Hypothesis II	46
4.3.1.3 Hypothesis III	48
4.3.2 Relative Significance of Factors Causing the Skills Gap.....	50
4.4 Overall Results of the Study	51
4.4.1 Main Findings	51
4.4.2 Other Findings	52
4.4.2.1 Skill Deficiencies and Skill Competencies	52

CHAPTER 5: CONCLUSIONS & RECOMMENDATIONS.....	56
5.1 Conclusions	56
5.2 Recommendations	57
5.3 Limitations of the Study	60
5.4 Future Directions	61
REFERENCES	62
APPENDIX 1: Final Questionnaires	67
APPENDIX 2: Preliminary Survey Results	81
