ABSTRACT

Employee turnover is well-known for being both expensive and disruptive to business operations. It is one of the most discussed topics in the Sri Lankan IT industry, which experiences a scarcity of workers to meet demand. Compensation and benefits (C&B) have been identified as one of the major contributors to employee turnover by previous studies. However, not all organizations can afford to pay competitive compensation and benefits comparable to those paid by large well-established companies.

This study quantitatively examines how performance appraisal (due process of performance appraisal and the purposes of performance appraisal) moderates the impact that compensation and benefits (both financial and non-financial) have on employee turnover intentions. The theoretical lens used to justify the hypothesising and later discussions was the Theory of Organizational Justice.

The primary data was collected using a questionnaire survey done among employees from various Sri Lankan IT firms. The sample consisted of 213 employees, with 86.9% of them being between the ages of 26 and 35. The data was analysed using the Structural Equation Modelling technique.

The findings of this study confirmed previous findings that compensation and benefits have a negative relationship with turnover intention. According to the findings, satisfaction with non-financial benefits has a greater impact on turnover intention than financial benefits. According to the findings, performance appraisal has no significant moderating effect on the impact of compensation and benefits on turnover intention.

Keywords: turnover intention, employee retention, compensation and benefits, organizational justice, performance appraisal, due-process of performance appraisal, IT sector

ACKNOWLEDGEMENT

This research is a result of support and inspiration from many people who have dedicated their precious time and effort, and I wish to convey my sincere gratitude to them for their support.

First and foremost, I would like to express my heartfelt gratitude to my research supervisor, Dr. Dharshani Thennakoon, Senior Lecturer, Department of Human Resources Management, Faculty of Management and Finance, University of Colombo for her constant guidance and encouragement, throughout the research.

I am grateful to Dr. Adeesha Wijayasiri and Dr. Kutila Gunasaekara, the MBA in IT program coordinators, for their invaluable support, guidance, and flexibility. I am grateful to Dr. Dilum Bandara, Conjoint Senior Lecturer at the University of New South Wales (UNSW), who gave continuous guidance to me and my batch mates during the study.

I wish to express our sincere appreciation to Mrs. P.R.D.Wijesingha, who supported me tremendously in completing the analysis portion of this research.

I would like to express my gratitude to all the research participants for their invaluable assistance. I may not have been able to complete this study without their honest support.

Finally, I would like to express my gratitude to my friends and family for motivating and supporting me during the research process.
