ACKNOWLEDGEMENTS

I am grateful to Archt. Vidura Sri Nammuni and Archt. Samitha Manawadu, senior lecturers, Dept. of Architecture, University of Moratuwa for the expert advice and correct guidance rendered to me throughout the preparation of this dissertation.

I am also grateful to Archt. Madura Prematilake, and Dr. L.S.R. Perera, senior lecturers, Dept. of Architecture, University of Moratuwa for their invaluable guidance.

I am deeply indebted to Surangi for her guidance and unreserved help given to me for the completion of this task without whose help this could never have been a reality.

I also offer my heartfelt thanks to colleagues Kamini, Ruvini, Upul, Menaka, Jayalath, Anil and Geethani for their invaluable assistance.

I am also grateful to Anurada and Rathnamal for assisting me in numerous ways to make this a success.

INTRODUCTION 01
0.1.Background to the study
0.2.Need for the Study
0.3.Intention of the Study
0.4.Scope and Limitations
0.5.Method of Study

CHAPTER ONE: ENVIRONMENTAL POLLUTION 04

1.0. Introduction 04
1.1. Biological and Chemical Pollution 04
1.2. Urban and Rural Pollution 05
1.2.1. Rural Pollution 05
1.2.2. Urban Pollution 05

1.3. Visual Pollution 06
1.4. Architectural Pollution 06
1.4.1. The concept of Architectural Pollution 08

University of Moratuwa, Sri Lanka.
Electronic Theses & Dissertations

CHAPTER TWO: ARCHITECTURAL LEGIBILITY 09

2.1. Concept of Legibility 09
2.1.1. Definition of Legibility 09
2.1.2. Legibility of Function and Context 12
2.2. The Psychological Implications of Legibility 14
2.2.1. The Image 14
2.2.2. The Role of Image in Legibility 15
2.2.3. Legible Built Environment 15

CHAPTER THREE: ROLE OF LEGIBILITY IN RESOLVING URBAN POLLUTION IN SRI LANKAN CONTEXT

3.1. Resolving Pollution in the Visual Environment 18
3.2. Principles and their Contribution in Resolving Pollution 19
3.2.1. Composition 21
3.2.1.1. Aesthetic Aspects 23
1. Principle of Unity 24
2. Principle of Proportion 27
3. Principle of Contrast 29

3.2.1.2. Functional Aspects 31
1. Relation to the Physical Context 32
2. Relation to Circulation Pattern 40
3. Relation to its Expression 42

3.2.2. Order and Hierarchy 43
3.2.3. Meaning 44
3.2.4. Identification 46
3.2.4.1. Identification of Urban Environment 47
3.2.4.2. Identification of Urban Buildings 49

3.3. Case Studies 51
3.3.1. City of Kandy 52
3.3.2. City of Colombo 62

CONCLUSION 84

LIST OF FIGURES

Fig.1. In modern world confusion is made worse when important public buildings and publicly irrelevant private buildings end up looking alike.
Fig.2. The rapidly increasing pollution of the built environment makes it difficult for people to identify themselves with the surrounding environment
Fig.3. Visual quality of the mental image.
Fig.4. -do-
Fig.5. Destruction of the image.
Fig.6. Perception of images
Fig.7. -do-
Fig.8. Arial view of Plazza San Pietro, Rome. Object building of the urban context, the most important building of the city.
Fig.9. In the modern world confusion is made worse when Object buildings come up without any meaning or public relevance.
Fig.10. Streetscapes are composed of enclosed planes and spaces.
Fig.11. Streetscape is the envelope space
Fig.12. Unity achieved in streetscape.
Fig.13. 1,2,3 and 4 illustrate the destruction of Unity by completing Dualities
Fig.14. Achieving Unity by avoiding Duality.
Fig. 15A. Correct proportion of building enhances the visual sensation.
Fig.15B. -do-
Fig.16. False proportion generate ugliness.
Fig.17. Contrast of form
Fig.18. Contrast of form gives special character to city form.
Fig.19. Colour and texture can be used to avoid monotony of the streetscape
Fig.20. Built scale determined by the size and height of the building.
Fig.21. Incorrect use of built scale violates the street rhythm.
Fig.22. Building line is important to maintain continuous façade.
Fig.23. Height and breadth of buildings maintain horizontal and vertical rhythms
Fig.24. Incorrect use of height and breadth of buildings.
Fig.25. Violation of corner treatment
Fig.26. Dominant element acts as punctuating points creating legibility
Fig. 27.a. Modern technology representing the corner.
Fig. 27.b. Pollution of the corner in the modern context
Fig.28. Doors windows and columns should harmonise with surrounding buildings
Fig.29. Building approaches
Fig.30. Building entrances.
Fig.31. Path space relationship
Fig.32. Activity expresses contemporary religious architecture
Fig.33. Context expression – Sydney Opera House
Fig.34. Form and shape explains the activity inside. Colloseum –Rome
Fig.35. Built form expresses spiritual and sacred value. Ronchamp Chapel –France
Fig.36. Piazza San Marco –Venice. A world famous public space.
Fig.37a. Built fabric - Kandy City.
Fig.37b. Map of Kandy Town.

Fig.38. Conformity with the Principle of Unity.
Fig.39. Wrong connection between buildings.
Fig.40. -do-
Fig.41. -do-
Fig.42. -do-
Fig.43. -do-
Fig.44. -do-
Fig.45. -do-
Fig.46. -do-
Fig.47. Queens Hotel Kandy – Rich contrasting view of the splayed corner at the street create vital appearance to the cityscape.
Fig.48. Temple of the Sacred Tooth Relic.
Fig.49. Good example for context and functional expression due to its form.
Fig.50. -do-
Fig.51. City of Colombo – Built Fabric.
Fig.52. Ceremonial Axis of Janadhipathi Mawatha.
Fig.53. The Arial view of Colombo Fort.
Fig.54. Colombo Fort – Built Fabric.
1. Sir Baron Jayatilake Mawatha
2. Janadhipathi Mawatha
3. Chatham Street
4. York Street
Fig.55. Representing the Principle of Unity.
Fig.56. Continuity creates a Directional view.
Fig.57. Continuity is weakened by the new development
Fig.58. Continuity achieved by the modern development
Fig.59. The Landmark gives a serial view
Fig.60. Principle of proportion achieved on the western side of York Street.
Fig.61. Absence of verticality and horizontality of the Grindleys Bank Violate the principle of Unity.
Fig.62. Rich detailing of façade enhance the visual variety of the streetscape.
Fig.63. Modern multi-storey buildings make rhythmic continuity of the street.
Fig.64. New buildings violate continuity of sky line.
Fig.65. Detailing of columns and window arches and the colour enhance the visual variety of the street.
Fig.66. Vertical rhythm provide variety to the street
Fig.67. Monotonous facades violating the principle of Contrast – Chatham Street.
Fig.68. Maintain the Continuity of the skyline in York Street.
Fig.69. The arcade – Grindleys Bank The ideal solution of pedestrian walkways in Urban Context.
Fig.70. Violation of continuity in new construction – Janadhipathi Mawatha.
Fig.71. Haphazard development destroys the entire street character
Fig.72. Maintaining similar floor to floor height.
Fig.73. The horizontal rhythm is destroyed by Grindleys Bank and Hemas building.
Fig.74. Corner building act as Punctuation Point of the streetscape.
Fig.75. Surface articulation of building in York Street is violated by Grindleys Bank.
Fig.76. Surface articulation is properly enhanced in York Street.

www.lib.mrt.ac.lk

Fig.77. Rich detailing and texture make contrast to the streetscape – Janadhipathi Mawatha.
Fig.78. Variation of unplanned detailing create confusion to the streetscape.
Fig.79. Modern application in Janadhipathi Mawatha
Fig.80. The continuous arcade of buildings create a liveable enclosure, a 'street' within- York Street.
Fig.81. Clock tower act as a landmark.
Fig.82. The view of Janadhipathi Mawatha.
Fig.83. Great example for context and functional expression.
Fig.84. Streetscape express the commercial character by the Shopping arcade
Fig.85. Functional expression in Janadhipathi Mw.
Fig.86. -do-
Fig.87. -do-
