# ABSTRACT

## PROCESS MAPPING IN CLOTHING MANUFACTURING

By S.M.D.S.D.Setunge (MSc/PG/T/CM/01/00)

Process mapping is a new technique for looking at the way a process is being performed and allows redesign that process for greater efficiency and productivity

Process maps are diagrams that show varying levels of detail what an entity does and how it delivers services. This research show the step by step approach in mapping the major processes in place, the key activities that make each process, the sequencing of those activities, the inputs and resources required and the out puts produced by each activity.

Finally this research giving a complete process map for a organization which cover from design to delivery in apparel industry after going through a step by step evaluation in the industry. One can develop further the final value flow to suit individual requirement. Having developed the final map for any organization can be used for the same mapping to allocate responsibilities and to calculate the man power requirement.

# ACKNOWLEDGEMENT

I have pleasure in giving my honour to Dr (Mrs) Nirmalee de Silva, Head Department of Textile and Clothing, University of Moratuwa for the privilege given to follow the M.Sc. in Textile and Clothing Management course.

I offer most sincere thanks to the Course coordinator Mr. D.P.D. Dissanayake, Senior Lecture Department of Textile and Clothing University of Moratuwa for his encouragement, guidance given to me during this course.

I wish to express my gratitude to the project supervisor Dr (Mrs) Nilanthie Heenkenda, Senior Lecture Department of Textile and Clothing University of Moratuwa. the assistance given to me in various ways for the completion of this project paper

I am much thank full to the Mr. Nihal Wanigathunga Senior Lecture Textile and Clothing Department University of Moratuwa for his guidance and advice generously given me at the latter part of my project.
