PARTIAL FULFILLMENT OF THE REQUIREMENTS FOR THE
DEGREE
OF
MASTER OF ENGINEERING

KARUNA SUSIL SENEVIRATNE
NOVEMBER 1996
This Thesis has not been previously prepared in whole or part to any University or Institution for a Higher Degree

K S Seneviratne

November , 1996
This thesis is an attempt to introduce a wastewater treatment system to treat wastewater generated in the production of Desiccated coconut in Sri Lanka.

In the preparation of this method of treatment based on biological treatment, attention was focused on the generation of liquid, gaseous and solid wastes and their impacts on the environment.

Alternative methods were discussed for end-of-pipe treatment of waste water, and in-plant measures to prevent and reduce waste generation also considered.

In conclusion, the proposed treatment system was evaluated in terms of economic and found that, it is economically viable.
ACKNOWLEDGEMENTS

I acknowledge with gratitude the kindness of Mr G K Amaratunga, Chairman, Central Environmental Authority, in giving me an opportunity to join this M.Sc Programme and enhance my knowledge in an area vital for man's survival.

I extend my gratitude and thanks for Prof (Mrs) N. Ratnayaka, Head, Department of Environmental Engineering, University of Moratuwa, under whose guidance and supervision this study was pursued, for her valuable criticisms and kind advice throughout with great enthusiasm.

Encouragement given by Dr S S Wickramasuriya, Dr. S Hettiarachchi, Dr Buvendralingam, Mr Pathinather and the Staff of University of Moratuwa, Sri Lanka and Dr V U Ratnayake, Mr. K G D Bandaratileka, Mrs R Ellepola, Mr M S D Munasinghe of Central Environmental Authority of Sri Lanka is acknowledged with sincere thanks.

There are many others to whom I am indebted for their kind and generous contributions for the successful completion of this task. To mention a few who should be singled out for special thanks.
Mr W A D D Wijesooriya, Deputy Director (NRM), (CEA) for his invaluable assistance extended to me at the time of need.

Mr K H Muthukudaarachchi, Asst. Director and Mr K G S Jayawrdana, Environmental Officer, CEA for their encouragement.

Ms Wasantha, Ms Chetika, Ms Achala, Mr Gunatileka, Mr Kularatne and Jagath for assisting in chemical analysis and the encouragement meted.

Ms Mano, Ms Visaka and others in the library of CEA for providing information on references.

Mr Rajaratnem, Ms Maduka, Ms Surangi, Ms Kamani and Ms Pushpa for producing this thesis in excellent print form.

Mr Ariyaratne, Mr Premadasa and Mr Jagath for their generous services.

My parents and wife for the encouragement.

Chapter 2  Literature review & Theoretical Considerations

2.1 General

2.2 Pollution Control Measures

2.2.1 Pretreatment of Coconut Water

2.2.2 Anaerobic Process

2.2.3 Aerobic process

2.3 Process Theory Involved

2.3.1 Terminology & Definitions

2.3.2 Mathematical Relationships of Decomposition Under Aerobic Conditions

Chapter 3  Experimental procedure

3.1 General

3.2 Laboratory and pilot plant Procedure for the Development of Process Design Criteria

Chapter 4  Results

4.1 Coconut water Characteristics

4.2 Anaerobic treatment Pilot Plat Study

4.3 Aerobic Treatment Bench Scale Study

4.4 Anaerobic Treatment Unit

4.5 aerobic Treatment Unit
